PROFILE

Junior Fullstack Software Engineer with hands-on experience building practical web applications using Next.js, React, TypeScript, Node.js and MongoDB. I enjoy taking a real problem that a user has and turning it into something that actually works — a clean interface backed by solid backend logic and a workflow that holds up. I am comfortable working across the stack, integrating third-party APIs, tracking down bugs and collaborating through Git. I also use AI tools to speed up development, but I always review and test the code myself before it ships

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Java
Frontend	React, Next.js, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Spring Boot
Databases	MongoDB, PostgreSQL
Practices	Git, GitHub, Debugging, REST APIs

EXPERIENCE

Fullstack Developer - Freelance Jan 2025 - May 2025
Customer Notification & SMS Automation Platform

- Built a fullstack web application for a small business that needed a simpler way to manage customers and send follow-up SMS reminders.
- Created the main dashboard, customer records, SMS templates, profile pages, delivery logs and error views with a responsive React/Next.js UI.
- Integrated the Twilio API and built backend functionality for scheduled messages, promotional links and operational tracking.
- Implemented authentication, authorization and role-based access for Admin and Worker users.
- Supported 100+ customer records with search, pagination, validation and full CRUD operations.

Technologies: Next.js, React, TypeScript, Node.js, Tailwind CSS, MongoDB, Twilio API, Git

Fullstack Developer - Omega Systems Internship Jul 2024 - Sep 2024

- Maintained and updated client-facing websites in a professional development environment using PHP, WordPress, HTML, CSS and JavaScript.
- Fixed front-end bugs, improved layout consistency and helped with cross-browser compatibility issues.
- Worked with developers through Git-based workflows, code updates and day-to-day task prioritization.

PROJECTS

CGC - Game & Movie Rating Platform University Thesis

- Co-developed a fullstack platform where users can browse, search, review and rate movies and games through authenticated accounts.
- Built the movie section with trending content, search/filtering, detail pages, similar-movie recommendations and TMDB API integration.
- Contributed to the application structure, MongoDB schema, authentication flow, signup/login, OTP email verification and reusable UI components.

Technologies: Next.js, React, TypeScript, Node.js, Tailwind CSS, MongoDB, TMDB API, Git

EDUCATION

University of Western Macedonia - Kastoria, Greece 2020 - 2024
Bachelor's Degree in Computer Science
GPA: 7.84/10

ADDITIONAL INFORMATION

Military Service: Completed **Activity:** IEEEExtreme programming competition participant **Languages:** Greek, English
